

KARI GREEN

Computer Science Engineer

– www.karigreen.com – (734) 474 7654 – cngreen@umich.edu – [linkedin.karigreen.com](https://www.linkedin.com/in/karigreen) –

A computer science engineering graduate (December 2017) from the University of Michigan with a demonstrated ability to quickly resolve complex, interdisciplinary problems improving computation efficiency and code quality. Proven ability to effectively communicate technical ideas and issues with non-technical end-users.

- Python
- C/C++
- SQL
- Linux/Bash
- Git
- C#
- Groovy/Java
- Jenkins/CI
- Docker
- HTML
- CSS
- JavaScript

EDUCATION

**UNIVERSITY
OF MICHIGAN**
Graduating Dec 2017

BACHELOR OF ENGINEERING: COMPUTER SCIENCE

- GPA: 3.5 — Magna Cum Laude
- Minor in Scandinavian Studies

EXPERIENCE

GE HEALTHCARE
May 2017 – July 2017

EDISON SOFTWARE ENGINEERING INTERN

- Optimized the software build process by creating a new containerized build system using Docker. Integrated new hardware into the build system. Achieved a 5x improvement in software compilation time.
- Scripted a Jenkins pipeline using Groovy and JSON files retrieved from GitHub to automatically initiate software builds. Allowed for continuous software integration and testing.

FAST ENTERPRISES
May 2016 – Aug 2016

SOFTWARE IMPLEMENTATION CONSULTANT INTERN

- Communicated with non-technical consumers to identify errors in the system or desired new functionality. Implemented and tested the agreed upon upgrades producing a more robust, higher-functioning product.
- Analyzed code changes for a major software upgrade. Pinpointed or resolved potential conflicts between the current code and the upgrade to significantly reduce the implementation time.

**KRESGE HEARING
RESEARCH INSTITUTE**
Jan 2010 – Present

RESEARCH ASSISTANT

- Designed and executed a project that evaluated antioxidants as a method for treatment of congenital hearing loss in a mouse model. These results provided an immediately viable treatment option for humans with the most common form of hereditary hearing loss. Published these findings in a first-authored paper in Nature's Scientific Reports.
- Advanced data analysis techniques in the lab by producing an algorithm that automates the quantification of ribbon synapses in the inner ears of mice. Upgraded other data analysis techniques in the lab by writing scripts that automatically provide T-tests and ANOVAs as needed. Allowed for faster, automated, and more complex data analysis.
- Produced 5 top-tier publications, 4 first-authored, and presented at multiple national and international conferences as a collaborator on many interdisciplinary projects related to language acquisition and hearing.

ACCOMPLISHMENTS

**UNIVERSITY
OF MICHIGAN**
2017

EA GAMES SPONSORED SENIOR DESIGN COMPETITION: SECOND PLACE

- Thrifty Thieves: 4 player video game written in C# using Unity

SOUTH BY SOUTHWEST
2016

SELECTED TO REPRESENT U OF M AT A MAJOR TECHNICAL CONFERENCE

- 3D-printed personalized medical devices
